**Central Communications**

## Reference

It is without reservation that I recommend Central Communications. PY Media believes that Central Communications Alice Springs has successfully combined the individual skills of Marc Woods and Jeff Farmer, benefiting us significantly by the introduction of a competitive local company able to meet our demanding standards. Frankness is a quality that WaruTech cultivates with suppliers and Central Communications stand out as a contractor who deals honestly. This type of relationship is of tremendous advantage when managing a major communications project and PY Media recently engaged Central Communications on a 'hand shake' basis for contracted tower construction plus rigging works of our wide area UHF CB repeater network located on the AP Lands in South Australia [http://www.waru.org/organisations/pymedia/warutech\\_uhf.php](http://www.waru.org/organisations/pymedia/warutech_uhf.php).

WaruTech appoints contractors based on merit and subjects them to an ongoing rigorous performance scrutiny. PY Media was pleased recently to list Central Communications as a preferred contractor for maintenance of our 18 retransmission, 48 homelands DTH satellite, and 16 UHF CB repeater sites.

Yours Faithfully,

Michael West
